

Applicants, without traverse, respectfully request the Examiner to proceed with Species II principally illustrated in the species that uses "factors having a correlation with the evaporator air temperature  $T_e$ , such as the surface temperature of the evaporator fin, can be detected and used instead of the evaporator air temperature  $T_e$ ". Applicants believe that Claims 1-6 read on the elected species and that at least Claims 2 and 5 are generic. Applicants request that the non-elected Claims be held in abeyance for possible rejoinder and/or further prosecution in future divisional and/or continuation applications.

### **CONCLUSION**

It is believed that a full and complete response has been made to the outstanding Office Action, and as such, the present application is in condition for allowance. Thus, prompt and favorable consideration of this Response is respectfully requested.
